

Primavera Earned Value Pack™

Comprehensive Earned Value Tools Enable Managers to Assess Project Efficiency and Forecast Final Costs of Active Projects

The Primavera Earned Value Pack adds Extensive Cost/Schedule Performance Management Capabilities to Primavera Products

The Earned Value (EV) Pack for Primavera strengthens the fundamental earned value capabilities of Primavera products with specialized tools that offer comprehensive earned

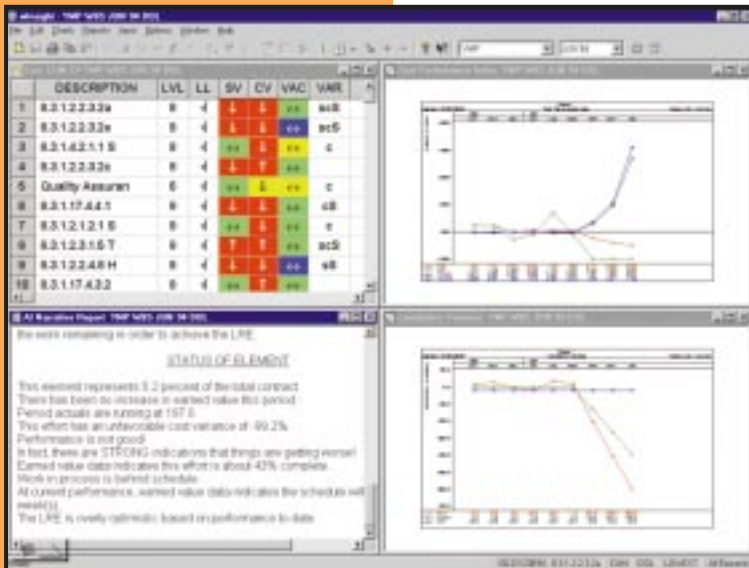

value functionality for demanding product managers. As early as 20 percent into the project, managers can determine how efficiently the project is progressing and forecast the final range of costs for the project when it is fully completed. The EV Pack allows cost/schedule professionals to review performance trends, generate statistical estimates at completion, and adhere to recognized Cost/Schedule Control Systems Criteria (C/SCSC) and earned value standards for their projects.

The EV Pack is an add-on to Primavera Project Planner® (P3™ and Primavera Project Planner® for the Enterprise (P3e™, and includes MicroFusion Millennium from Integrated Management Concepts, Inc., and wInsight from C/S Solutions, Inc. The EV Pack strengthens cost/schedule performance management for customers in both commercial and government sectors, as well as

organizations in the aerospace and defense industry. The combination of products gives cost/schedule professionals all the tools they need to effectively use earned value techniques to control their projects.

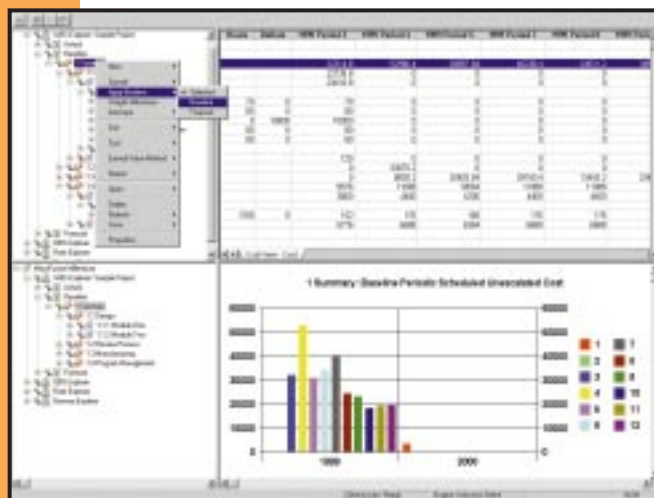

Project Planning and Scheduling

Independently, Primavera's products offer fundamental earned value capabilities with project cost, schedule, and resource planning functionality. However, some customers need more comprehensive earned value capabilities and a historic, auditable, cost/schedule control system that meets federal regulations.

wInsight's quad chart provides an overview of performance information for all project areas. Manage by exception by sorting with any of 80 different metrics.

Use the quad screen view of MicroFusion Millennium to quickly understand project performance by time period

Primavera Earned Value Pack™

Benefits of Using the Earned Value Pack:

- Complete set of integrated earned value tools for multiproject analysis
- Quickly identify and focus on problem areas
- Analyze performance trends to forecast completion dates

MicroFusion Millennium Benefits:

- Data are provided for pricing, performance measurement, resource planning, and cash flow
- Detailed reporting and analysis capabilities are based on historical timeperiods
- Flexible period basis reporting fits your company's standards

wInsight Benefits:

- Easy-to-use interface lets you quickly find important project information
- Graphically display historical trend data and forecast with onscreen charts
- Generate reports "on-the-fly" and display detailed information about each element
- Access full set of graphical tools for earned value analysis

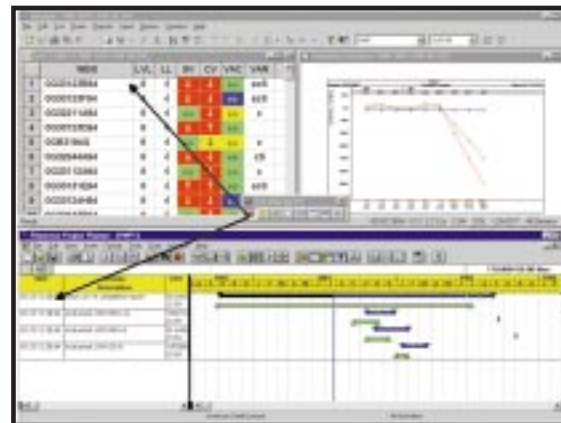

P3e Benefits:

- Project professionals have the ability to plan, budget, monitor, and control all of their projects with efficiency and foresight
- Oracle and Microsoft SQL Server databases provide maximum scalability
- Take advantage of a suite of project management tools that fit into today's distributed work environment

With that in mind, wInsight and MicroFusion Millennium are vital extensions to the project management features of Primavera products.

Earned Value Engine

MicroFusion Millennium functions as an engine that combines the fundamental planning and scheduling of Primavera products with wInsight's graphical earned value analysis capabilities. It addresses the cost management needs for both the pricing and project control aspects of the program, and it provides complex period-based rate applications, the collection of actual costs, and comprehensive earned value for both commercial and government reporting.

Use wInsight to quickly drill down to selected activities within P3.

Graphical Performance Measurement

wInsight provides sophisticated performance measurement and reporting and analysis capabilities, and it enables the exchange of performance information with project teams dispersed over the Web. wInsight focuses on analyzing and presenting performance data so cost/schedule professionals and project managers can make timely business decisions.

C/S Solutions' wInsight is a proven earned value analysis and measurement tool, with leading programs in the United States Air Force, Army, Navy, Department of Energy (DOE), Federal Aviation Administration (FAA), and Defense Contract Management Command (DCMC). These and many other industries are using it to integrate earned value into their management processes.

Use the EV Pack to solve your project control problems:

Problem: You need to produce historical performance charts and reports to analyze past performance.

Solution: The EV Pack enables managers to create historical project reports based on user-defined periods. Project information from Primavera products is used to create the reports.

Problem: You need to know how much your project will cost at completion and whether or not it will finish on time.

Solution: As early as 20 percent into a project, the powerful earned value capabilities of the EV Pack will help you understand current progress and forecast completion values.
