

Instructions: Microsoft Database Customer Information Form

Due to Microsoft royalty reporting rules, this completed form must accompany EVERY Primavera sales order that includes Microsoft SQL Server database software. **Note:** “Named-User” licenses are sold by user, not by Primavera application. Thus, if one person uses multiple Primavera products, only one named user database license is required for that user.

This form applies to:

- 1) New customers receiving Microsoft database software from Primavera for the first time
- 2) Customers adding additional Primavera licenses to a system running on a SQL Server database originally provided by Primavera.
- 3) Customers who received SQL Server 7 from Primavera and are now upgrading to SQL Server 2000.

See the Database FAQ for More Information:

<http://pars.primavera.com/salesmktg/Integration/Oracle/DBLicenseFAQ.asp?Page=Forms>

Instructions:

Top section: Complete the requested sales order number and customer and Sales information.

Question 1: Choose database version and operating system.

Question 2: Identify the database server

Question 3: Select a database license type (named or CPU) and complete the appropriate fields.

Note: CPU licenses are based on the number of processors in a server. If a server has more than one processor, it requires more than one CPU license.

Examples:

- A) Customer purchases 10 P3 licenses, 20 Primavision licenses, and 50 Progress Reporter licenses for 80 individuals (i.e. – each user only uses one Primavera product). Customer has no database licenses and needs them from Primavera.

Correct Entries:

- a) 80 Total number of users
- b) -10 Number provided by Primavera (see current sales terms and conditions)
- c) -0 Customer does not have any licenses
- d) 70 Extra licenses needed
- e) \$21,000 Cost of the extra licenses ($\$300 \times 70$) (Charge the customer this amount)

Note: If all of these users are on a single server with a single CPU, it is better to purchase a single CPU license for \$5,000, a savings of \$16,000.

Note: If each person uses more than one Primavera product, the total number of users in Field A could be as low as 50 in this case.

- B) Customer purchases 10 P3e licenses, 20 Primavision licenses, and 50 Progress Reporter licenses for 80 individuals (i.e. – each user only uses one Primavera product). Customer already has purchased full-use licenses for 40 of the employees and needs the rest from Primavera.

Correct Entries:

- a) 80 Total number of users
- b) -10 Number provided by Primavera (see current sales terms and conditions)
- c) -40 Number of licenses provided by the customer
- d) 30 Extra licenses needed
- e) \$9,000 Cost of the extra licenses ($\$300 \times 30$) (Charge the customer this amount)

Note: Again, a CPU license may be better for this customer

- C) Customer purchases 3 P3e licenses, 3 Primavision licenses and 3 Progress Reporter licenses for 3 users (each person uses all three products). Customer needs database licenses.

Correct Entries:

- a) 3 Total number of users
- b) -3 Number provided by Primavera (see current sales terms and conditions)
- c) -0 Customer does not provide any database licenses
- d) 0 Extra licenses needed
- e) \$0 Cost of the extra licenses ($\$300 \times 0$)

Question 4: This form must be signed by an authorized person to be processed.

Microsoft Database Customer Information

Microsoft Corporation requires this information about every order that includes Microsoft database software

Purchase Order Number: _____

Customer:

Company _____

Address _____

City _____ State/Province _____

ZIP/Postal Code _____ Country _____

Contact _____ Phone _____

Primavera Sales Representative:

Company _____

Sales Representative Name: _____ Phone _____

1) Choose Database Version and Server Operating System:

Microsoft Database	Server Operating System
<input type="checkbox"/> Microsoft SQL Server 2000 Standard Edition (Note: Database software is licensed for use only with Primavera software)	<input type="checkbox"/> Windows NT/2000/XP

2) Server Description: (Complete a separate form for each server)

Server Brand and Model: _____ (i.e. Dell XPS 9000)

Number of processors in the server: _____

3) Choose One License Type:

(All database licenses provided by Primavera are for use ONLY with Primavera software)

Named User License: This license type requires a license for each Primavera user.

a) _____ Total number of users of all Primavera products

b) _____ - Minus the number of "free" licenses provided by Primavera (see current price list)
(For upgrades, include the number of licenses originally provided by Primavera)

c) _____ - Minus database licenses provided by the customer

d) _____ = Number of extra licenses needed (x US\$300 each) = e) _____

CPU License – This license type is based upon the number of CPUs in the database server, not the number of named users accessing the database software.

(#CPUs): f) _____ x US\$5,000 per CPU = g) _____

4) Authorized Signature:

Signature: _____ Date: _____

Name (print): _____
